Aleksandr Dmitrijev

UX/UI Designer | Creating intuitive & modern interfaces | COOD OÜ
Estonia

Summary

About me

UI/UX & Web Designer working with Figma, Adobe XD, Photoshop, Illustrator, and prototyping tools like FigJam, Miro.

I design clean interfaces, intuitive user flows, and scalable visual systems for websites and web platforms.

What I've done

- Created wireframes, prototypes, and visual concepts in Figma for commercial websites
- Delivered 15+ custom UI/UX web solutions for Estonian enterprises
- Designed responsive UI using component-based workflows, auto-layout, and design tokens
- Built scalable design systems aligned with development stacks (Tailwind)
- Improved UX through audits, heuristic analysis, and user flow optimization
- Worked directly with stakeholders, transforming business requirements into structured UX deliverables

Industries I've worked with

- Energy / Power solutions
- Logistics / Supply chain
- E-commerce
- Marketing & digital services
- Corporate and service websites

My approach

- Function-first design: clarity, hierarchy, and measurable improvements
- Research-driven workflow using Hotjar, Analytics, competitor analysis, and prototype testing
- Clean, scalable UI suitable for modern frontend frameworks
- Design as a business solution, not aesthetics for the sake of aesthetics

Work preferences

- Flexible work arrangements, including on-site, hybrid, or remote options
- Project-based or long-term cooperation
- Collaboration with dev, marketing, and product teams
- Time zone: UTC+2/+3
- Open to collaborating closely with development teams and occasionally diving into frontend tasks when needed

Where I'm most effective

- Creating UI architecture, user flows, and visual systems from scratch
- Improving existing products through structured UI/UX analysis
- Fast, systematic delivery with consistency across all screen sizes
- Acting as a bridge between design, product, and development

Experience

COOD OÜ

UI / UX designer / Developer

July 2025 - Present (6 months)

Tallinn, Harjumaa, Estonia

As founder and operator, I deliver custom web solutions for Estonian and Finnish companies (Besst Technologies OÜ, AEMA OY) and coordinate the entire project lifecycle, from requirement gathering to production release.

Webclusive OÜ

UI/UX designer & front-end developer

September 2016 - Present (9 years 4 months)

Tallinn, Harjumaa, Estonia

Design and optimization of user interface (UI) components and graphical elements for webapplications, with a focus on enhancing usability and delivering a seamless digitalexperience.

Strategic planning and oversight of design projects, including timeline management, resource coordination, and quality assurance, to achieve optimal outcomes within established deadlines.

Implementation of robust project documentation and file management systems, streamlining workflows and maintaining accessibility to key design resources for ongoing operational efficiency.

GRSMARINE OÜ

Graphic designer / IT specialist

June 2017 - January 2025 (7 years 8 months)

Tallinn, Harjumaa, Estonia

Provided technical support for employees by resolving issues with PCs, printers, mobile devices, and internet connectivity; delivered software guidance; set up workstations and user accounts in Windows, Office, and Outlook. Administered the corporate website, selected and procured equipment and software, and monitored hardware usage. Configured the office network, implemented and managed a NAS server for automated backups, and handled user access permissions to maintain security and compliance. Additionally, contributed to UI/UX tasks by improving website structure, designing user-friendly page layouts, creating interface elements in Figma, and enhancing the overall user experience across internal and external digital products, while also producing graphic materials for print and creating polished visual assets for presentations.

AF5 Grupp OÜ

Frontend Developer

December 2013 - June 2014 (7 months)

Tallinn, Harjumaa, Estonia

Engaged in various projects such as the development responsive web design for customersites based on Bootstrap v3.0.2 - v3.1.1.

Tallship

Freight forwarder

July 2012 - February 2013 (8 months)

Tallinn

Education

Tallinna Tehnikaülikool

Bachelor's degree, Logistics, Materials, and Supply Chain Management · (2008 - 2011)
